

# INDIJI LEC CAPABILITY STATEMENT 2026

ABN: 19 672 511 661

Electrical Contractor Licence: 1509261

# COMPANY OVERVIEW

---

“Rooted in Heritage,  
Driven by Innovation”

Indiji Lec is a trusted Indigenous electrical contracting company providing expert solutions across solar energy, mining maintenance, and air conditioning (AC) services.

With a strong focus on safety, reliability, and innovation, we deliver tailored electrical solutions that meet the highest industry standards for residential, commercial, and industrial clients.

Our qualified and experienced electricians are committed to delivering projects safely, on time, and within budget — while maintaining compliance with all Australian Standards and site-specific requirements.

# OUR COMMITMENT

---

## Empowering Indigenous Voices, Transforming Industries

---

- **Safety First:** Full compliance with WHS standards and site induction requirements.
  - **Quality Assurance:** Certified systems and practices ensuring consistent, high-quality delivery.
  - **Sustainability:** Promoting renewable energy solutions and energy-efficient systems.
  - **Customer Focus:** Reliable service and transparent communication from start to finish.
- 

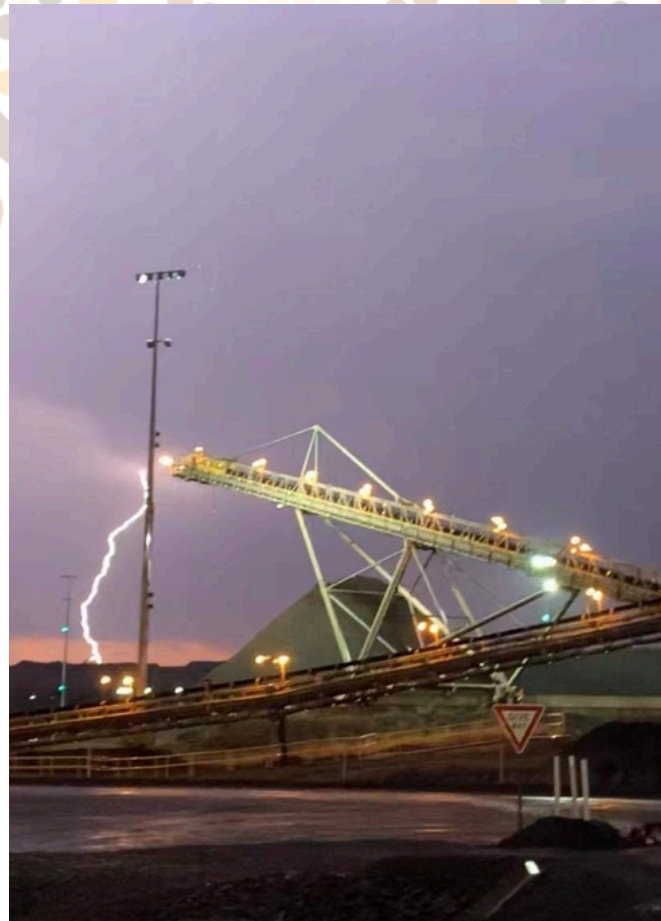

## KEY DIFFERENTIATORS

---

### Building Stronger Communities, One Project at a Time

---

- Indigenous-owned and operated enterprise
  - Proven experience in remote and helicopter-accessible projects
  - Cross-industry capability: solar, mining, HVAC, and electrical
  - CEC-accredited solar and ARCTick-certified air conditioning technicians
  - ISO-aligned systems for safety, quality, and environmental management
  - 24/7 emergency response and national mobilisation capacity
- 

# **COMPANY VALUES**

At INDIJI LEC, our values are grounded in our identity as a proudly Indigenous-owned and operated business. We honour culture, respect Country, and build with integrity. Our mission is to create meaningful opportunities for Indigenous people, empower communities, and deliver high-quality electrical services that leave a lasting, positive impact. Through collaboration, cultural insight, and a strong sense of responsibility, we bring both deep community connection and industry expertise to every project we undertake.

# CORE CAPABILITIES

## Electrical Services

- New installations, upgrades, and fit-outs
- Testing, tagging, and compliance reporting
- Fault finding, breakdown response, and repairs
- Preventative and scheduled maintenance

## Solar Energy Systems

- Design, supply, and installation of solar PV systems
- Off-grid, hybrid, and grid-connected solutions
- System monitoring and performance optimisation
- Battery storage integration and maintenance

## Mining Maintenance

- Site electrical maintenance and shutdown support
- LV and HV system servicing
- Equipment and plant electrical repairs
- Preventative maintenance scheduling and audits

## Air Conditioning & HVAC

- Residential, commercial, and industrial installations
- Split systems, ducted, and evaporative cooling
- Servicing, repairs, and efficiency upgrades
- Climate control and smart energy solutions

## CCTV & Access Control

- Installation of advanced CCTV surveillance systems
- Rapid response for repairs, system upgrades, and component replacements

# CERTIFICATIONS

---

## Certifications & Compliance

- Licensed Electrical Contractor **Licence No: 1509261**
- CEC Accredited Solar Designer & Installer
- ARCTick Certified for Refrigeration & Air Conditioning
- Fully insured for Public Liability and Workers Compensation

## A note from our Head of Access Control & CCTV, Junmar Look

With over a decade of experience in the telecommunications and electronic security industries, our Head of Access Control and CCTV brings extensive technical and project knowledge across multiple sectors – from domestic installations to large-scale commercial systems.

He quickly established a strong reputation for quality workmanship and technical reliability, which led to progression into commercial and enterprise-level systems to further develop and refine his skill set.

“Started in the telecommunications industry since 2011.

I have been involved in coax, data, mobile towers and fibre design, installation from domestic to commercial industries.

The last 7 years I have been involved in CCTV and Access control, from designing and installing. Starting on domestic properties,

I grew a name and experience and slowly branched out to commercials to help gain knowledge and experience. I have extensive knowledge with Hikvision, Dahua, reo-link and Ubiquiti/Unifi CCTV equipment. Integriti, Inner-range, Hills, Bosch Alarm and access control systems.

My knowledge and experience doesn't just cover these areas, I am able to implement and understand IT scenarios which in turn helps getting any CCTV and access control system up and running faster. I have great problem-solving skills which help me resolve and execute scenarios, so that jobs still get done in a timely manner.”

Junmars Leadership Philosophy is summed up by,

“I’m focused and driven in my field – committed to delivering high-quality, reliable systems that meet our clients’ operational needs. I expect my team to share the same passion for innovation, precision, and professional excellence.”

# POWERING TOMORROW TOGETHER
